Use the kit in three steps

A practical sample of the Nourished cooking and planning approach.

- Choose one recipe, check the ingredients and make the stated batch.
- Use the shopping checklist for all three recipes only if you want to make all three. It includes leftovers from the soup.
- Put recipe ideas in your organizer alongside your other food, sides and snacks. It is not a full daily meal plan.

Before cooking

All three base recipes contain milk; the wrap also contains wheat. Check oats, tortilla and broth labels for other allergens and cross-contact. Lactose-free dairy still contains milk protein. Substitutions change nutrition estimates.

Food safety

Refrigerate perishable food within 2 hours (1 hour above 90 °F / 32 °C). Keep the refrigerator at 40 °F / 4 °C or colder. Use safely stored cooked leftovers within 3-4 days or freeze sooner; reheat cooked leftovers to 165 °F / 74 °C.

Recipe nutrient values are retained calculated estimates, not laboratory results. Brands, portions and substitutions change them. Ask your healthcare team about personal nutrition needs.

A worked organizer example

This shows where recipe ideas fit alongside other food. It is not a complete three-day diet.

Day	Recipe idea	What I still choose
1	Oats jar; make a soup batch.	Other meals, sides and snacks that suit me.
2	A soup portion; assemble the wrap.	Other food and portions based on my own needs.
3	A safely stored soup portion, or another recipe.	Variety and additions; freeze soup extras promptly.

What happens to the soup?

The recipe makes four servings. Label portions with the cooking date. Keep what you will use within 3-4 days in the refrigerator and freeze extras sooner. The recipe does not have to be eaten on consecutive days.

Make it yours

You can try only one recipe. The organizer is a place to plan convenient food, not a rule to eat every slot. Discuss ongoing low intake or symptoms with your care team.
